PROQUIL-AL

DEGREASING DEOXIDIZING CLEANER FOR ALUMINIUM

DESCRIPTION

PROQUIL-AL is an acid-based cleaner, admixed with humidifying agents and tensoactives, especially formulated for cleaning non-lacquered or anodised aluminium. Due to its special composition, it cleans, degreases and deoxidizes at the same time.

USES

PROQUIL-AL is especially recommended for cleaning and deoxidizing aluminium and non-polished stainless steel. It cleans and deoxidizes tyres, aluminium boxes in trucks, aluminium elements, degreases fuel pump bodies, aluminium tanks, etc.

DOSES

PROQUIL-AL will usually be used diluted with water and by spraying. The dilution of **PROQUIL-AL** in water will depend on the dirtiness of the surface to be cleaned. The most usual are dilutions of 1 part **PROQUIL-AL** with 5-40 parts of water.

METHOD OF USE

Spray the **PROQUIL-AL** solution upwards on the surface, covering the whole surface with the foam and let the product work a few seconds to 1 minute, depending on the degree and type of dirt. Rub slightly, if necessary, with a soft brush and finally rinse, while rubbing, with pressure water.

In case of use by immersion, when cleaning small pieces, make dilutions of **PROQUIL-AL** with water about 1:3 to 1:6 and immerse the pieces for 10-30 seconds. Then rinse with abundant pressure water.

PRECAUTIONS

Avoid contact with eyes or skin. Don't breath the spraying cloud. In case of contact with eyes, wash immediately with plenty of water and seek medical advice . Use gloves while applying. In case of not enough ventilation, use the appropriate breathing equipment.

PACKAGING

PROQUIL-AL is packaged in 30, 50 and 60 litres non-reusable plastic containers.

ADVANTAGES

- Concentrated product
- Fast cleaning without effort.
- When sprayed, it forms and adherent foam
- Economical, due to its use strongly diluted with water.
