

PRODUCT N° :4115

## **TECMASIL PRIMER**

### **SEALING PRIMER FOR SILICATE PAINTS**

#### **DESCRIPTION:**

**TECMASIL PRIMER** is a penetrating and sealing primer for porous surfaces, which controls absorption and reinforces the surface of the substrates which are to be painted with silicate based paints, such as **TECMA PAINT SILICATOS**.

#### **CHARACTERISTICS:**

Nature	: Silicate
Adherence	: Perfect on a great range of supports
Dilutant	: Water
Recommended yield	: 8 - 10 m <sup>2</sup> /l depending on the porosity
Application	: Brush or roller
Drying time at 20°C - 55% R H	: Touch – 4 hours / Repainting – 24 hours

#### **PROPERTIES:**

Excellent adherence on a great range of supports, such as mortars, brick, fiber-cement, concrete, natural and artificial stone.

It doesn't get damaged by fungi or algae.

Excellent sealing and impregnating power.

High penetration in the substrates, thus reinforcing them on their surfaces.

#### **FIELD OF APPLICATION:**

As sealing primer for concrete, lime and cement mortars, masonry, rendering, brick, etc., on façades and inside and outside walls.

#### **SURFACE CONDITIONING:**

Surfaces should be free from grease, oil, loose particles, dust or any other pollutant. The substrate could be slightly damp but it should never have pools.

#### **METHOD OF USE:**

Stir the contents in the containers before applying. Apply the primer after diluting with water in a 1:1 proportion, covering the whole surface. When applying silicate based paint in dark colors, the primer can be used mixed with water and with the paint in a 1:1:1 proportion, in order to control even more the absorption.

Twenty four hours after applying, the paint can be applied.

**SPECIAL RECOMMENDATIONS:**

- Never apply with temperatures below 10 °C or with relative humidity above 85%.
- Protect surfaces such as glass, anodized and lacquered aluminum, glazed surfaces, etc.

**PACKAGING AND STORAGE:**

**TECMASIL PRIMER** is supplied in 10 and 25 liter plastic containers. The product should be stored in a cool place, always protected from frost.
